Introduction

About Us!

Heritage Destination Consulting Ltd (HDC) is a UK based tourism consulting firm with offices in the UK, USA and Chile. We specialise in the supply of a wide range of heritage interpretation and tourism destination products and services to clients around the globe.

We offer a complete range of products and services from simple site assessments, master planning strategies and heritage interpretation training to interpretive panel and exhibit fabrication, viewing telescopes and binoculars, interactive multi-media application and museum lighting, displays and models.

Our international clients come from both the private and public sector and range from historic sites, nature reserves, national parks, tourist attractions, museums, governments and agencies.

HDC Telescopes & Binoculars

HDC are the official international agents and distributors of all SeeCoast and DigiLens viewing telescopes and binoculars.

SeeCoast and DigiLens are two of the world's leading manufacturers of high-quality coin and non-coin operated viewing telescopes and binoculars. Our scopes are installed in some of the world's best known Visitor Attractions, Theme Parks, Zoos, National Parks, Wildlife Refuges, Hotels & Casinos and can be found in over 80 countries around the globe.

Our customers choose our range of viewing scopes because of the classic style, robust design and remarkable record of durability and reliability.

Quality Commitment

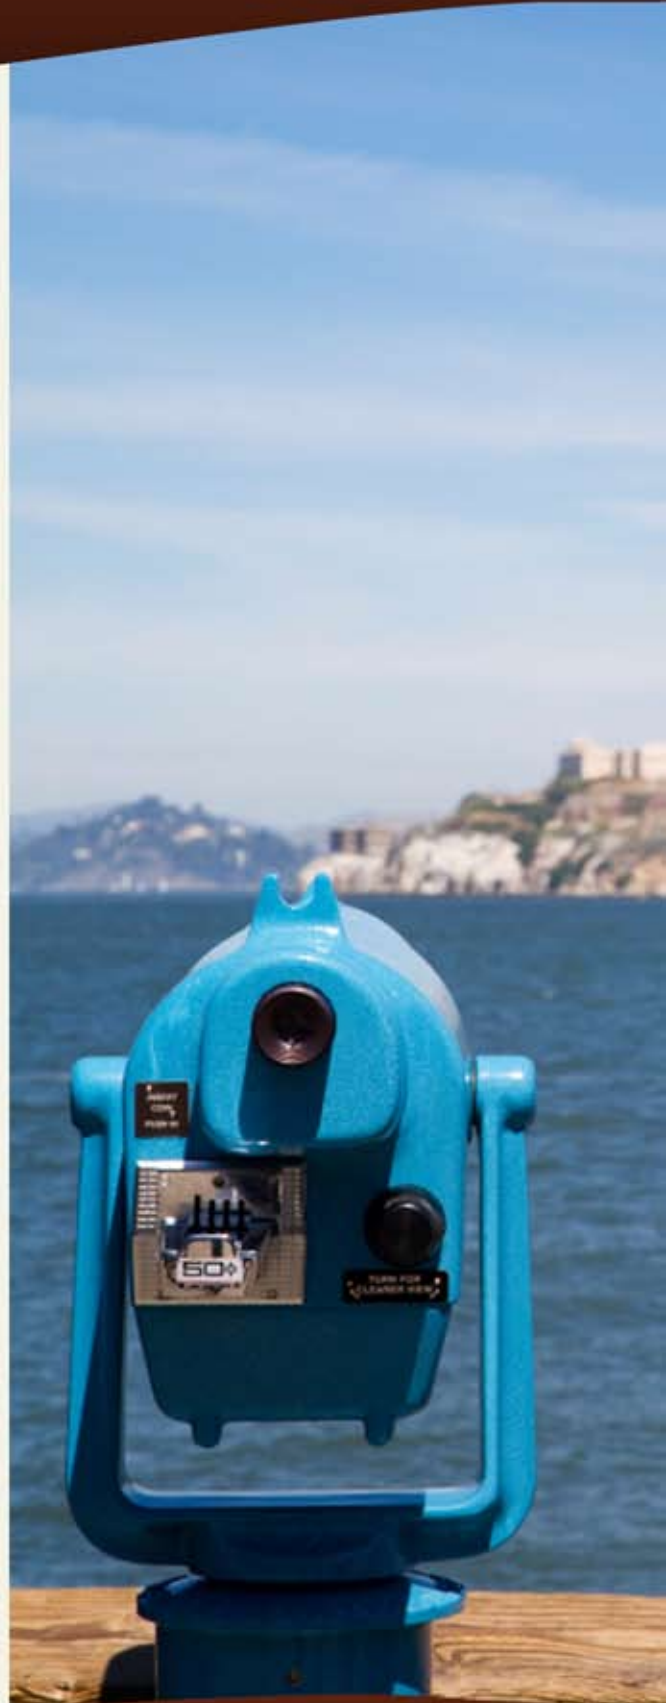

Our Commitment to Quality

The range of HDC viewing telescopes and binoculars are designed to spend years outdoors subjected to adverse weather and public abuse.

The precision of our machined viewer heads is on par with aircraft standards. Our scopes are manufactured from high quality aluminum alloys which are then sealed against corrosion. The internal components are made of high-grade materials such as brass and stainless steel. The optics are precision ground lenses with prisms that are hard coated and protected by tamper-proof optically flat surfaces. All our scopes come with a 3-year limited warranty, however with minimum maintenance, our viewers are built to last indefinitely.

We offer full, half and wheelchair accessible bases. To meet special installation requirements or to maintain architectural harmony, we offer free standing units with full weighted bases and custom mounting. Installation is simple and does not require any special tools. The viewer head arrives in a carton ready to attach to the base by means of a lock and key. The base arrives ready to bolt to the surface. Once installed the viewer is ready for operation.

Whether you select a scope from our SeeCoast or DigiFox range, you can be assured that you have selected the finest optics available.

Base Options

We offer a range of base options to fulfill all your installation needs.

Like our scope, we don't skimp on quality when it comes to the bases! We use high-quality materials which are powder coated and lacquered for long, weather-proof life.

Full Base

This allows children to use scope with ease and it adds base support in windy locations.

Half Base

Same as a Full Base but for installations against retaining walls.

HDC SeeCoast MK2

Non Coin Operated Binoculars

This is the best low-cost viewing binocular on the market!

The MK2 non-coin operated Binoculars are our very popular low cost option. The MK2 is equipped with automatic focus and 10X magnification allows for a clear, aberration-free panoramic viewing. The MK2 viewing binoculars are ideal in situations where you need both distant and close-up viewing - for example; a location that has spectacular distant sea views, as well as birds nesting on near-by cliff tops or on the sea-shore. The binocular vision you get with binoculars gives the viewer depth of field which you can't get with a telescope. The MK 2 is a non coin operated unit (donations box can be fitted) and comes with a range of bases, including disabled bases.

- Manual Focus: Focuses on objects beyond 15.24 meters
- Power: 10x40 optic, Magnifies by 10
- Field of View: 367" cm at 914 meters
- Relative Brightness: 24 / twilight factor 20
- Eye Height: Standard 147 cm
- Accessibility: ADA/DDA compliant handicap base
- Weight: 14.5 KG
- Telescope Width: 30.5 cm
- Telescope Length: 45.7 cm
- Housing Movement: Traverse 360° degrees; 45° up/down
- Construction: 356 Aluminum, 36.5 mm aluminum pipe
- Base Size: Full 76.2 cm, Half 43.2 cm diameter
- Available in standard colours

HDC SeeCoast MK3

Coin & Non Coin Operated Binoculars

The Mark 3 Binoculars are real head turner - and because they get noticed, they get used, and if they get used and you opt of our coin-operated version, they make a great deal of money! Installed in a good location, we have had reports from clients that the MK3 has paid back its costs in less than a year! Now, we can promise you that rate of return, however they are an exceptionally good investment that can pay out for years to come! The MK3 is fitted automatic focus for wider viewing where the objects are in close.

The 10X magnification allows for clear long-range panoramic viewing with closer details clearly visible with a strong depth of field. The MK3 is available as non coin-operated and coin-operated with a range of bases, including disabled bases to suite every type of installation.

- Manual Focus: Focuses on objects 15.24m to infinity
- Power: 10x50 optic, Magnifies by 10x
- Field of View: 930 cm at 914 meters
- Eye Height: Full/Half base 145 cm; Step 28 cm Rise
- Accessibility: ADA/DDA compliant handicap base 115 cm
- Weight: 47.7 KG
- Binocular Width: 30.5 cm, Length: 55.9 cm
- Housing Movement: Traverse 360° degrees; 50° up/down
- Construction: 356 Aluminum, 114.3 mm aluminum pipe
- Base Size: Full 76.2 cm, Half 43.2 cm diameter
